Site Security

Your landfill is responsible for both security of the site and the safety of users, employees, and the public. We hope you already have a plan in place, and if so, please review it. If not, you need to develop a plan. Below are some tips to help you get started in developing your site security.

Train staff to control access to the site by vehicular and foot traffic.

Install physical access gates, barriers, and fences.

Examine wastes entering the facility (hazardous and toxic materials).

Install internal signage that is clearly visible and legible.

Continuously train staff in CPR, AED, basic safety, and emergency procedures.

Monitor and protect wells.

Hold weekly safety meetings to discuss general issues around the site.

Active Shooter training.

“Be who you are and say what you feel, because those who mind don't matter, and those who matter don't mind.”

Bernard M. Baruch
